Specifications

Model name	20EX200T 20EX200R	16ES200T 16ES200R	24ES200T 24ES200R	32ES200T 32ES200R	40ES200T 40ES200R	60ES200T 60ES200R
High-speed input	2 points of 100kHz; 6 points of 10kHz; Max. 8 points for single-phase input; Max. 4 points for 2-phase 2-inputs					
Pulse output		2 points of 100kHz; 2 points of 10kHz				
High-speed comparison interruption			8 points			
External input interruption			8 points			
COM port		Built-in 1 RS-232 port, 2 RS-485 ports				
Built-in analog I/O	Yes		No			
AC motor drive/ Servo drive control commands		Yes				
Extension module connection		Connectable to 8 analog extension modules				
Motion control instructions		Yes, with S-curve acceleration/deceleration function				
Program execution speed		Execution speed of basic instructions: 0.35 ~ 1 μ s				
Program capacity		16k steps				
Function block editing		Yes				
Password protection		Restriction on incorrect password entry, subroutine password and PLC ID				
Max. I/O points		256 input points + 16 output points, or 256 output points + 16 input points				

Enhanced Program Execution Speed

Enhanced Extension I/O Refresh Speed

Cycle time for 200 I/O points

The refresh speed of extension I/O on DVP-ES2 has been greatly enhanced. Only 5 μ s is required to refresh one I/O point and 1ms for 200 I/O points, which improves the operation efficiency of the PLC.

Enhanced Program Execution Speed

LD

The execution speed of basic instruction LD has been enhanced to 0.54 μ s, which is a big improvement on the instruction operation efficiency.

MOV

16-bit data movement instruction

DMUL

32-bit multiplication instruction

DEMUL

32-bit floating point multiplication instruction

The execution speed of application instructions has been greatly enhanced, allowing more complicated program operation.

High-Speed Input

DVP-ES2 is built-in with 8 points of high-speed input (2 points of 100kHz, 6 points of 10kHz) and supports U/D, U/D Dir and A/B counting modes.

Counting mode	Counting pulse	
Type	Up (+1)	Down (-1)
1-phases 2 inputs (U/D, DIR)	U/D	DIR
1-phase 2 inputs (U, D)	U	D
2-phase 2 inputs (A, B)	A	B

Set up A/B counting mode to double frequency or 4 times frequency in special register (D1022).

D1022	Counting diagram
Double frequency (k2)	
4 times frequency (Default:k4)	

Hardware High-Speed Counters

Input	1-phase 1 inputs		1-phase 2 inputs						2-phase 2 inputs			
	C243	C244	C245	C246	C247	C248	C249	C250	C251	C252	C253	C254
X0	U		U/D	U/D	U	U			A	A		
X1	R		Dir	Dir	D	D			B	B		
X2		U					U/D	U/D		A	A	
X3		R					Dir	Dir		B	B	
X4				R		R			R			R
X5								R				R

Pulse Output

DVP-ES2 is built-in with 4 axes of pulse output (2 points of 100kHz, 2 points of 10kHz) and supports Pulse, Pulse/Dir, A/B and CW/CCW modes.

Input	D1220				D1221			
	K0	K1	K2	K3	K0	K1	K2	K3
Y0	Pulse		Pulse	A	CW			
Y1		Pulse	Dir	B				
Y2					Pulse		Pulse	A
Y3						Pulse	Dir	B

High-Speed Comparison Interruption

Use DHSCS or DHSCR high-speed comparison instructions to achieve real-time interruption once the high-speed counter reaches the counting target.

The counting sensor sends out the signal of the object currently passing through to the high-speed input points on DVP-ES2. The high-speed comparison interruption instructions are able to execute the next step once the counter reaches the assigned number.

DVP-ES2 is built-in with 2 sets of hardware counters and 4 hardware comparators for each set.

Hardware counters	A				B			
	A1	A2	A3	A4	B1	B2	B3	B4
Counter #	C243, C245-C248, C251, C252							C244, C249, C250, C253, C254
High-speed comparison interruption	I010	I020	I030	I040	I050	I060	I070	I080
High-speed comparator	4 A comparators							4 B comparators

Built-in 3 Serial COM Ports

DVP-ES2 is built-in with 1 RS-232 port and 2 RS-485 ports. The ports can operate together. DVP-ES2 can be Master or Slave and supports Delta Q-Link protocol to enhance the speed of HMI screen display.

The 3 serial ports built in DVP-ES2 are able to construct a complex multi-layer network structure, increasing the system flexibility.

Built-in Analog I/O in 20EX2 Models

Motion Control Instructions

Variable High-Speed Pulse Output

Immediate Frequency Change

Mask Function

Alignment Mark

Zero Return Instruction Searching for Zero Point Automatically

DVP-ES2

● Close Loop Positioning

The close loop positioning instruction compares the encoder feedback signal with the PLC pulse output instruction and decides whether to set up the same number of output pulses. Compensation will be made if difference occurs to ensure correct number of output pulses.

● Tabulated Pulse Output

● Absolute/Relative Positioning

Delta's AC Motor Drive / Servo Drive

DVP-ES2 is able to control AC motor drive or Servo drive through output current and analog voltage signals output from the analog module.

DVP-ES2 has new instructions designed particularly for the communication with Delta's AC motor drives and Servo drives.

AC motor drive	FWD	REV	STOP	RSTEF	RDST
Function	Forward running	Reverse running	Stop	Reset	Read status
Servo drive	ASDRW				
Function	Read Status, read/write data, speed and position instruction				

Use output points on DVP-ES2 to set up the multi-function input terminals on AC motor drive or Servo drive for conducting multi-section positioning.

Highly Functional Analog Module

- All analog modules are of 14-bit resolution.
- The temperature measurement modules support PID auto-tuning.

DVP04PT-E2 and DVP04TC-E2 temperature measurement modules are built in with PID function, allowing PID tuning to be directly conducted in the module to reduce the PLC load and achieve better overall efficiency.

Password Protection

Subroutine Password & PLC ID

The subroutine password and ID can be 4 ~ 8 digits.

The number of allowed incorrect entries of main password can be set up.

Enhanced Instruction Application

SPA & GPS support solar tracker

The 2 instructions working with GPS can effectively achieve the highest efficiency for the solar tracker.

- 2-axis solar tracking
- Single-axis solar tracking
- Fixed mode

SPD able to detect 4 input points synchronously

Use 4 SPD instructions in the program at the same time, and each instruction can be single-phase or double-phase input.

Input X & output Y support force ON/OFF

Use software to force control input and output points for trial run and debug.

Extension Module Connection

Flexible Mapping Mode

All the setting up and reading of the parameters in DVP-ES2 can be done easily in the software. Every analog/digital or digital/analog value in the analog module corresponds directly to a special D device in DVP-ES2. The user does not need to use FROM/TO instructions as before.

In the past, you needed to compile programs to read/write the value.

The New Programming Software: ISPSoft

The New Programming Software: ISPSoft supports ladder diagram, function block and many other programming modes and is able to edit program in modular way. ISPSoft saves your time in developing large projects. Use the already made function block over and over again to increase your economical benefit. ISPSoft is compatible with all DVP series PLCs.

Task Designation

To create new cyclic or interruption programs, you have to create new POU and designate TASK first. Undesignated POU will not be executed.

Function Block

The complicated project can be parted to many program units or function blocks. The function block can be used repeatedly.

The New Programming Software: ISPSofT

Function Block Import/Export

Password Protection

The user can set up password for each function block. When the block is used in other programs, the password is required to open the editing window of the block.

Variable Declaration

Global variable: Separate from the program. The corresponding physical I/O point of the variable is defined only after the program is compiled. The user does not need to modify the program when the definition of the physical I/O point is changed. Only the device corresponding to the variable needs to be modified.

Local variable: Stored in POU. If the user does not give it a device, the system will automatically allocate a device to the variable when compiling.

When writing the function block, it is suggested that the variable be configured by the system itself to increase the independency of the block.

Designate corresponding physical I/O points

Device List

The device list helps the user to know clearly all the devices used in the program.

Structural Editing

Every section of the program is composed of many networks. ISPSofT provides many kinds of components for the user to drag for use.

The user can enable/disable every network to trial run or debug the program and clarify the program structure.

Flexible Use of Components

Drag the components in the function library to use for editing.

Complete Monitoring

The "Program monitoring" and "Device monitoring" allow the user to keep track of the operation of program.

Compatible with WPLSoft

The user can convert the file edited in WPLSoft to be compatible with ISPSofT.

Output point type	Relay-R	Transistor-T
Output point No.	All	Y0 Y1 Y4~Y17, Y2 Y3 Y20~
Current spec.	2A/1point (5A/COM)	0.5A/1point (4A/COM)
Voltage spec.	<250VAC, 30VDC	5 ~ 30VDC
Max. Load	75VA (inductive) 90W (resistive)	12W/1 point (24VDC)
Response time	Off→On On→Off	Approx .10ms 3μs 30μs 100μs
Max. output frequency	50Hz	100 kHz 10 kHz 1kHz

Analog I/O of DVP-ES2

Items	Analog Input (A/D)		Analog Output (D/A)	
	Voltage input	Current input	Voltage output	Current output
Analog I/O range	±10V	±20mA	±10V	0~20mA
Digital conversion range	-2,000 ~ +2,000	-2,000 ~ +2,000	-2,000 ~ +2,000	0 ~ +4,000
Resolution	12-bit (5.0mV=20V/4,000)	12-bit (10.0μA=40mA/4,000)	12-bit (5.0mV=20V/4,000)	12-bit (5.0μA=20mA/4,000)
Input impedance	>1MΩ	250Ω	-	
Output impedance	-		0.5Ω or lower	
Tolerance carried impedance	-		>0.5Ω	<500Ω
Overall accuracy	Non-linear accuracy: 1% of full scale within the			

Power Consumption

Model name	Max. power consumption	24VDC supply current (power)
DVP16ES200R/T		
DVP24ES200R/T		
DVP32ES200R/T		
DVP40ES200R/T		
DVP60ES200R/T		
DVP20EX200R/T		
DVP24XN200R/T	30VA	500mA (12W)
DVP24XP200R/T		
DVP32XP200R/T	R:25VA T: 20VA	100mA (2.4W)
DVP08XM211N	1.2W	
DVP08XP211R/T	R: 1.2W T: 1 W	
DVP08XN211R/T	R: 1.2W T: 0.5W	
DVP16XM211N	2.4W	
DVP16XP211R/T	R: 2.4W T: 1.6W	
DVP16XN211R/T	R: 2.4W T: 1 W	
DVP04AD-E2	1W	
DVP02DA-E2	1.5W	
DVP04DA-E2	3W	
DVP06XA-E2	2.5W	
DVP04PT-E2	1.5W	
DVP04TC-E2	1.2W	

Example:

When the system is composed of 32ES200R + 08XP211R + 16XP211R + 16XN211R, the ES2 MPU can only supply 12 (1.2+2.4+2.4) = 6W.
